

Specification:

Operating voltage	230 B ~ 50 Гц
Output voltage	12V ~
Power:	10 Вт
Temperature range	50 - 350 °C

Rhein
Feigen

Rhein STONE

This compact device is designed to model a high-quality product. This device uses the latest technology, taking into account economic and environmental aspects.

e.WAX HiTech WK-10

Electric spatula for
wax modeling

This device has a rounded
shape and attractive design
and requires little space.

This device uses the latest
technology, taking into account
economic and environmental
aspects.

The main element of this device
is an ergonomic, miniature
soldering iron

Heating takes from 20 to
30 seconds due to the
use of a powerful 7.5 W
heating coil.

Easily changing attachments allow the
use of various modeling techniques.

Content:

- Electric spatula e.WAX
HiTech WK-10
- Holder
- 4 modeling tips, integrated
heater, 2 mm hole
- User manual

Smooth temperature control, integral heater
design, protection from dangerous electric
currents and long service life are a prerequisite
for this new development.
